

Ambient Services
Air Conditioning Services

After relocating to a warehouse/offices we contacted Ambient Services about installing air conditioning/heating. They were extremely helpful and advised us on the different systems best for our requirements. After speaking to another couple of Companies we found Ambient offered us the most competitive package.

The installation took the amount of time quoted and their time keeping was impeccable. They were clean and tidy workers and left us with the least amount of disruption to our working day.

We would highly recommend Ambient Services. We have also taken out a maintenance agreement with them and look forward to working with them in the future.

Many Thanks
